

NALLY MEGABINS

The Nally MegaBin is the original Australian bulk bin. Designed for fruit and vegetable movement and retail high performance the Nally MegaBin is clearly the way of plastic produce bins in Australia.

Rounded corners and smoother interior surfaces results in less bruising and damage to your produce. Multiple vents in sides and base provide superior airflow so products cool faster adding valuable shelf life to your produce. Unique design with rounded entry has a larger forklift entry height than wooden bins, and the smooth, non-absorbent surface is not affected by dipping operations.

The design is compatible with most bin handling equipment. Bins feature unique moulded label holders for cards and tags. Small, exterior pads reduce scratches. Easy, clear ownership with identification with hot foil stamping. Comfortable handholds are built in for easy lifting and handling of bins. The positive interlocking foot design permits fast and safe stacking.

Nally Megabins are up to 40% lighter in weight than wood bins and the weight is constant as they don't absorb moisture. This allows for increased freight efficiencies of 4-5%. In practice you are able to transport 2-3 extra bins of fruit per semi-trailer load.

A strong bin cover, tipping bars, liquid bungs, hotstamping and numbering are all available at your request.
